Hybrid Description: IDA MGT FAO 230

Candidate variety: EU 2nd year applicant in 2014

Product Position: Recommended product for good habitat and dual use

Large bodied corn with wide leaves, intensive type for double utilization. With intensive technology it can produce record yields. **Kernels with rich carotene content**, deeply sitting long kernels on the thin cob. Its stalk and root strength above average. It has good plant health and very good adaptability

Recommended plant population at harvest: for grain: 60-65.000 / ha, for silage: 70-75.000/ ha.

- Shape: cone-cylinder
- No. of rows: 16-18
- Color of the cob: red, white
- Kernel type: semi dent
- Color of the kernel: yellow
- TKW: 310 g
- Hectoliter weight: 79-81 kg/hl
- Protein content: 9,1 – 9,3 %
- Starch content: 71 - 73 %
- Oil content: 3,4 – 3,6 %
