|------------------------------|------------|---------------------------|----------------------|
| ➤ <u>development autumn:</u> | medium | ➤ <u>Code Nr.:</u> | 1675-08 / Reg. in SK |
| ➤ <u>development spring:</u> | very fast | ➤ <u>type:</u> | linie variety |
| ➤ <u>flowering:</u> | very early | ➤ <u>grain weight:</u> | ~4,63gr./1000 grain |
| ➤ <u>plant high:</u> | short | ➤ <u>glucosinulat:</u> | ~13,3μmol |
| ➤ <u>maturity:</u> | early | ➤ <u>oil content:</u> | ~44,9% |
| ➤ <u>logding:</u> | medium | ➤ <u>yield oil:</u> | ~ 1.900kg/ha |
| ➤ <u>winterhardiness:</u> | very good | ➤ <u>Yield potential:</u> | ~ 4.270kg/ha |

SOWING RATE: 70 grain / m²

SOWING TIME: early – normal

FERTILIZER: fast youth growing
N-fertilizer as soon as possible in spring

HARVEST: early

Marcelo is a new linie variety registrated in Slovakia 2015.

The sowing time should be early – normal. Marcelo is not growing too fast in autumn and building optimal plant stadium before winter. Therefore the winterhardines is very good, which was also tested under cold winter conditions in Poland.

Marcelo has a fast growing in spring and early flowering. The plant height is short – medium. The maturity of Marcelo is early and homogenies, which gives an easy and safe harvest.
