

Variety description

NAIAD - winter oilseed rape

- | | | | |
|------------------------------|------------|---------------------------|---------------------|
| ➤ <u>development autumn:</u> | fast | ➤ <u>Code Nr.:</u> | CWH233 / Reg. AUT |
| ➤ <u>development spring:</u> | fast | ➤ <u>hybrid typ:</u> | OGURA |
| ➤ <u>flowering:</u> | very early | ➤ <u>grain weight:</u> | ~4,5gr./1000 grain |
| ➤ <u>plant high:</u> | medium | ➤ <u>glucosinulat:</u> | ~13,8µmol |
| ➤ <u>maturity:</u> | early | ➤ <u>oil content:</u> | ~44,4% |
| ➤ <u>logding:</u> | medium | ➤ <u>yield oil:</u> | ~ 2.200dt/ha |
| ➤ <u>sclerotinia:</u> | very good | ➤ <u>Yield potential:</u> | ~ 5.500kg/ha |

SOWING RATE: 50 grain / m²

SOWING TIME: normal – mid/late

FERTILIZER: fast youth growing
N-fertilizer as soon as possible in spring

HARVEST: early

NAIAD is a hybrid with rather fast growing in autumn as well as in spring and with an early flowering. So the hybrid is using the moisture from winter very good and can finish building up yield before it is getting dry. Therefore NAIAD is also very good under dry conditions.
